Odyssey 4.6 MR5

Spectrum

2014 marks B&L Information System's 32nd user conference. Back in 1982, attendees came from California, Indiana, Michigan, New York and Pennsylvania for two days. Since then, the name and the venue have changed but the goals are the same now as they were in 1982:

- Demonstrate how to get optimum use out of the computer (aka software)
- Showcase system enhancements available
- Exchange ideas between B&L clients

In 2014, Spectrum will be hosted in beautiful New Orleans, Louisiana (aka NOLA).

**Join the fun.
Learn the tech.**

Updating!

Congratulations to long-time B&L clients (users of B&L's legacy software, BLIS) who are beginning the conversion process to the Software as a Service (SaaS) model of Odyssey.

DANLY Consulting Services
 Manufacturing Solutions • Project Management • Business Development

Danly Consulting Services, LLC is a consulting firm specializing in manufacturing solutions, project management, and business development. We can assist you in:

- ERP selection and implementation
- Lean manufacturing projects
- Process improvement
- Capacity constraints
- Production and inventory control systems
- Mergers and acquisitions
- Business growth

We serve small to mid-sized companies where special knowledge and experience is needed, or existing staff is not available to complete critical projects.

The company was founded on the principle that most business owners and senior managers do not have enough time to complete important projects. DCS has partnered with many organizations to champion these projects and provide valuable outside perspective and support.

Primary Contact Name: Mark Danly

New for 2014:

This year at Spectrum, B&L will have a special “metalcasting” room where attendees will be able to see first-hand the capabilities of the new User Interface Shop Floor Manager (SFM) as well as the current SFM UI screens. You will be given:

- The opportunity to clock-in, job-on and/or off production, and experience the Quality Viewer.
- The ability to create a wide variety of transactions, including: production, scrap, indirect, setup, downtime, material inventory, physical inventory and equipment analysis transactions.

at **SPECTRUM 2014** – NOLA

The Metalcaster's Room

- A chance to access Intelligent Views and/or data views as you prefer.
- A look behind the scenes at Shop Cards, Process Sheets and Work Orders.

All using a variety of display devices commonly used in production environments. This will be an **Odyssey experience room**. There are no set times. Join at any time, as your schedule allows, to ask questions on the topics highlighted and learn-by-doing.

Odyssey 4.6 MR5

Bridgman, MI, July 15, 2014 – B&L Information Systems has launched Odyssey 4.6 MR5 for general availability. Updates to Odyssey 4.6 MR5 include:

- Added new transactions to the Production Interface
- Offering a choice of use of the Microsoft Windows on-screen keyboard or Odyssey keyboard
- Added the ability to automatically display work instructions (via the Quality Viewer) from the Shop Floor

Manager during a Job On (web UI, only).

The complete release notes for Odyssey 4.6 MR5, with detailed explanations of each function, may be found on B&L’s website, in the customer portal. Odyssey users can update from any version of Odyssey to Odyssey 4.6. Any assistance needed in the update process is free for clients on maintenance with B&L.
